

A world of complex plastic forming...

Lighting

Supplier to the Professional Lighting Industry

We produce:

- Screens for both indoor and outdoor lighting.
- Customer designed screens – let us help you make your design or idea into a finished product.
- Screens for the lighting industry, including production of new items as well as production for renewal of existing solutions.
- Vacuum formed screens, which are often financially advantageous alternatives in renovating jobs.
- Screens in clear, coloured and opal plastic materials, depending on their shape.
- Screens in knock proof and UV-resistant materials, which are often used in exposed areas such as roads and parks.
- For the Lighting Industry, we also produce customer-made reflectors, junction boxes, cable coverings, etc.
- If you need an active partner and manufacturer for your lighting project, do not hesitate to contact us.
